

D.A.R. S.R.L. has been active in the processing and production of nuts and dried fruit for more than 20 years. At the beginning of our activity, we turned to local producers who had already been operating in the area for some time. As we have grown, we have expanded our production, also relying on international suppliers. The company operates in the Campania region; our production site is in Lauro in the province of Avellino. This is where we produce and market all our dried fruit and Mr. Dar brand products. D.A.R. S.R.L. deals with wholesale and retail sales of dried fruit and nuts and their derivatives such as chocolate dragées, pralines and breakfast products. We deal with suppliers, wholesalers, sweet industries and other retailers in Italy and worldwide. We mainly deal with the wholesale of hazelnuts in all its forms such as hazelnut paste, which is very popular with ice-cream and pastry bakeries, but also hazelnut shells; walnut flour and natural walnuts in shell, peeled and shelled almonds, pistachio nuts in shell and pistachio grains and all dried fruit in general. All these products are available in packages of 250 grammes up to 10 kilograms, perfect for the large-scale retail market. The company's core business is the shelling of nuts and hazelnuts, but the company is making a name for itself with its entire range of products. This is thanks to the certifications we have acquired and our hard work, which we try to carry out in the best possible way.

Our brand “Mr.Dar – The nuts specialist” in born in 2008 with the aim of bringing nuts and dried fruit products to the tables of Italians but not only. After years of experience, the products marketed under the brand “Mr.Dar – The nuts specialist” are mainly walnuts, hazelnuts, almonds, pistachios and their derivatives or dried fruit in general. Under our own brand we also sell chocolate dragées, pralines and breakfast products. Our focus on the quality of nuts and dried fruit As the food sector is very sensitive, D.A.R. S.R.L. has always stood out for the many certifications it has acquired over the years. We have BRCGS certification, which attests to the level of product safety as well as the quality of the production processes. We work with dried fruit using procedures that minimise the risk of altering the flavour, aroma, appearance of the product. In addition, our “Mr. Dar – The nuts Specialist” branded products are carefully packaged by our workers, while quality control personnel carry out laboratory inspections and analyses before the products are placed on the market.

QUALITY CONTROL

D.A.R. S.R.L. has always been considered synonymous of quality. This is guaranteed by continuous controls along the entire supply chain process: from the selection of raw materials through processing to retail. The quality control of our products makes use of advanced laboratories in which the most complex microbiological analyses are carried out.

The dedication and perseverance with which we work to control our products has led us to obtain the most important certifications:

BRC (global standard for food safety)

This guarantees that our brand products are produced according to clearly defined quality standards. This guarantees the food safety of our products and is a necessary prerequisite for being able to export our products, as well as a strong guarantee for the reliability of our company.

Kosher certification

This concerns the set of religious rules governing the nutrition of observant Jews. This allows us to export our products to countries where the Jewish religion is observed.

FDA registration (Food and Drug Administration)

Guarantees the safety of public health by ensuring that food is healthy, safe and appropriately labelled.

R&D

D.A.R. S.R.L. has always been committed to satisfying all the needs of its customers. We adopt an innovative Research and Development model, making use not only of internal resources but also of collaborations with external partners (such as suppliers and Universities). Our aim has always been to anticipate technological innovations and to ensure environmental sustainability, food safety and well-being for consumers. For this reason, we periodically conduct market research to help us intercept and satisfy the needs of demand. The success of D.A.R. S.R.L. is not just determined by innovative products, but also by the benefit we can create for our customers and the planet. We strongly believe that technological innovation is an essential element of growth and plays a central role in our business strategy. D.A.R. S.R.L. is committed to the development of better products for people's health, as well as to the creation of environmentally sustainable packaging that minimises the impact on the environment. Investments in Research and Development help us to do our job better and to offer our customers safe, quality products.

AZIENDA

HAZELNUTS

HAZELNUTS

The hazelnuts plant (filbert) for peasant civilization has always been a magical tree. In ancient Rome it was used offering a hazelnut plant, *corylus avellana*, to bring happiness, a bountiful harvest was a sign of fertility for the family.
